

OPTIONS

High energy efficiency, compact version, low noise version, brazed plate / shell & tube heat exchangers, AC / EC fans, inverter technology, freecooling, total / partial recovery, complete hydronic kit with pump/s and buffer tank, special versions on demand.

CUSTOM

We can offer a very wide range of standard products, designed and developed for ordinary requirements, but our main focus is on customization. An expert and skilled engineering team works to find and offer different solutions for different requirements.

BENEFITS

- » Microchannel exchangers
- » Turbocor compressors
- » Highest EER & SEER
- » High level of quality for all manufacturing process
- » Reliability
- » Easy to use/manage
- » Low level of refrigerant gas
- » Respect for the environment

In love with **innovation**

We **know** the past,
we **create** the future.

Hecoclima is a **new company** in the HVAC world, established to become a real alternative among chillers and heat pumps manufacturers.

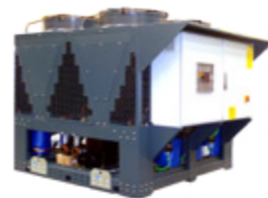

Hecoclima was established within the **Geoclima** group, a company specialized in design and manufacture of special chillers, and it can count on values, ideas, know-how and experience gained in **more than 20 year of presence in the HVAC field.**

This collaboration with Geoclima culminated in the development of a **new test center with a climate chamber** that makes it possible to simulate the actual running and installation conditions of every unit.

In this way, Hecoclima can ensure the best offer and the highest reliability.

Our growing range.

-  10 - 1000 kW
-  10 - 900 kW
-  30 - 900 kW

VHA
Air cooled chiller

CH	chiller
CH ECc	chiller with Circlemiser technology
FC	free cooling
HP	chiller reversible to heat pump
HPD	dedicated heat pump
HPX	chiller reversible to heat pump with liquid injection technology
4T	multipurpose unit for 4 pipes system
4S	multipurpose unit for 2 pipes system + independent production of technical hot water

VHH
Water cooled chiller

CH	chiller
HP	chiller reversible to heat pump
4T	multipurpose unit for 4 pipes system
4S	multipurpose unit for 2 pipes system + independent production of technical hot water

VHR
Air cooled chiller plug fan

CH	chiller
HP	chiller reversible to heat pump
4T	multipurpose unit for 4 pipes system

VSA
Condensing unit

CH	chiller
HP	chiller reversible to heat pump

VSE
Condenserless unit

CH	chiller
-----------	---------

VSH
Water cooled condensing unit

CH	chiller
